

The clients preferred these ideas from across our low-fi designs:

- Ethan's Wheel
- Aaron's About Page
- Zana's Hover over Regina 6

Other notes throughout the class:

- The SDG news is not a top priority. The hover-over sections are very engaging and recommended. The dropdown menu is also good, It's a good way to sort and clean everything up and keep it simple.
- Least clicks is very important
- We should decide on a name/logo
- Community-based logo
- The site won't necessarily have all 17 SDGs
- Volunteering should be a second focus (lower importance)
- Simple page for main data; SDG, data, about
- The clients like the MyPeg sidebar
- Liked download and share functionality
- SDGs should link to other SDGs
- Show overall items on one slide of a presentation
- Ask questions in the middle of presentations for easier time for clients
- Have a backup plan for wheel, which may be hard to create in WordPress
- Include Infographics
