

### Summarized Customer Notes (Activity 4. Final Presentation)

#### Positives:

- Large improvement since activity 3.5
- Consistency throughout all pages with theme, colours, and design
- The Home page is catchy and captures the user's attention, minor text adjustments can be made but overall, the customer was satisfied.

#### Improvements:

- Combine the first 2 paragraphs on the About page. Make the first sentence about the community indicator system for Regina.
- It would be intuitive to click the UN SDG logo, Colleen recommended making the whole logo clickable, or at least moving the link underneath the logo instead of being separated to the side.

(Not much feedback was given to our group for this activity)
